**Winter Is Coming To Ukraine, part 3**

# WICTU progress over the years

Since the beginning of the war in Ukraine in 2022, the civil population has suffered immensely. Each WICTU product has been targeted to support most acute needs for families and children.

## PART 1 in 2022

2260 Portable generators to schools for 300,000 children

## PART 2 in 2023

8100 Wood burning stoves to support 50,000+ people

## PART 3 in 2024

Continue with stoves to support growing needs. → Targeting 15,000 stoves

*Winter will be difficult, so we strongly encourage citizens to be energy resilient. In particular, to install alternative sources of power and heat.*

Ukrainian Prime Minister Denys Shmyhal

# WICTU as Lions Project

---

## 100% Controlled by LIONS

We are proud to have Lions involved in all processes from the raw materials to production, and from the factory in Finland to the homes of the families in Ukraine!

## 100% Financial Transparency

Cost is 150 € per stove, VAT included.  
This donation enables  
a production of one high-quality stove,  
transported to Kharkiv, Pavlograd,  
Zaporizhia, and delivered to local  
families in need!

## 100% LIONS Visibility

Our stove will have a huge LIONS Logo,  
laser engraved on the cooking surface,  
so user will be reminded every day that  
we, LIONS, helped!

# LCIF is onboard

---

Donations to WICTU 3 project from all Lion members, Clubs, Districts and Multiple Districts are automatically registered as LCIF donations and are also eligible for Melvin Jones Fellows (MJF) credits.

# The Lions Stove

Based on earlier market research and existing cooperation with production partners, we decided to continue with the same successful Lions Stove!

This special designed LIONS stove meets all the requirements:

- Highly effective, made of stainless steel, perfect for heating.
- Big surface to cook food.
- Ash box to collect ashes and to control the draft in the stove.
- Engraved LIONS logo on the cooking surface.
- Instruction manual included, both in English and Ukrainian.
- Cost effective in every aspect: manufacture, transport, maintenance.

Here you can see a video about the stove production: [Production Video](#)

Did you know that we produce our stoves under the free [Creative Commons license](#) from [Konekansa](#) design.
